

■ ARE YOU BUILDING THE SOLUTIONS RIGHT ?

BUSINESS PROCESS MODELING

DO YOU HAVE

- Lack of common understanding of the project
- Indispensability of a few individual brains
- Difficulty in understanding the business problem
- Repeated training needs to fresh teams on domain
- Variation in solution with perceived customer expectation

THEN, WE SUPPORT YOU

- To implement a Business Process Model
- Based on UML as common language
- Creating a common understanding of the business problem
 - Acts as a business domain and activity reference point
 - Helps to fulfill the customer expectation

WITH EFFECTIVE AUTOMATION USING

- UML based tools like
 - IBM Rational XDE
 - IBM Rational Software Architect
 - IBM Websphere Business Modeler V6.0

HOW BUSINESS PROCESS MODELING ENSURES THE BEST ROI?

Business Process Modeling bridges the gap between domain knowledge and automation requirements. It helps to elicit the right requirements for automation. Business Modeling acts as the starting point for the further traceability down the development life cycle. It ensures that the development meets the expectation of the customer regarding the system scope.

More than anything else, it eliminates reworks due to business domain related issues. This accounts for a major percentage of rework on a normal development scenario. Correcting defects at a later stage can cost up to 100 times than in the beginning. Thus provides the best ROI..

WHY ASTRA INFOTECH?

- Rich Industry Experience
- Practical approach
- Methodology driven
- Technology and tool level certified consultants
- Process focus
- Solution for root causes elimination
- Industry leading multiple tool expertise
- Proactive support
- Tools, Training, Consulting and Trained resources, all under one roof

OUR SERVICE OFFERINGS

- Tool training & implementation
- Onsite consulting assignments
- Software Engineering audits
- Short/long term onsite manpower placement
- Project/Product based outsourced assignments
